

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Prescient Core Global Emerging Markets Equity Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV (the "ICAV")

Share Class: A USD. This Fund is managed by Prescient Fund Services (Ireland) Limited (The "Manager")

Objectives and Investment Policy

The Fund's investment objective is to achieve long-term capital growth appreciation by seeking to outperform the MSCI Emerging Markets Index (the "Benchmark").

The objective of the Fund may be achieved by primarily gaining indirect exposure (through the use of collective investment schemes) to a diversified portfolio of emerging market equity and equity-related securities. Direct exposure may also be taken to such asset classes if this is considered to be more efficient. The Fund can invest up to 100% of the Net Asset Value in emerging market equities and equity-related securities (including common stock, American depository receipts and global depository receipts, equity linked notes, and rights (which allow holders to subscribe for additional securities of the issuer)), which are listed on a Recognised Exchange worldwide.

The Fund may invest up to 75% of its Net Asset Value in collective investment schemes, including money market funds and exchange traded funds (which are eligible for investment by a UCITS).

The Fund may also hold cash or ancillary liquid assets (comprising short-term money market instruments which will be listed on a Recognised Exchange, bank deposits and cash equivalents) for cash management purposes, as cover for derivative exposure, pending investment or in anticipation of future redemptions. It is possible that up to 100% of the Net Asset Value of the Fund may be held directly or indirectly (via investment in collective investment schemes) in cash or money market instruments at any time.

The Fund may use financial derivative instruments for efficient portfolio management. The financial derivative instruments used by the Fund will be exchange traded futures and swaps. Financial derivative instruments may be traded on a Recognised Exchange or over-the-counter. Investment will focus on large-cap and mid-cap equity and equity related securities in emerging markets that closely resemble the capitalisation composition of the Benchmark across countries and

sectors. The Fund is considered to be actively managed in reference to the Benchmark by virtue of the fact that it seeks to outperform the Benchmark and it uses the Benchmark as a universe from which to select securities (while at the same time seeking enhancement opportunities).

The majority of the Fund's securities may be components of and may have similar weightings to the Benchmark, however, the Investment Manager may use its discretion to invest in equity securities in order to take advantage of specific investment opportunities. Any income arising from the Fund will be reinvested and it is not intended that the Fund will pay dividends.

The Fund is suitable for investors that seek long-term capital growth and can accept the volatility in capital values expected from a diversified emerging market portfolio.

These investors will typically have a medium to high-risk profile. You may buy and sell shares in the Fund on each Business Day in Ireland. Unless otherwise defined in this document, all words and expressions defined in the ICAV's current Prospectus shall have the same meaning herein. Please refer to the "Investment Objectives and Policies" section of the Prospectus and the "Investment Objective and Policy" section of the Supplement for further information.

Risk and Reward Profile of the Fund

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The Fund is classified in the category indicated above due to the past behaviour of its target asset mix. The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Liquidity Risk** – certain stock markets have low liquidity which means it may be more difficult to buy or sell shares than on a more developed market.
- **Currency Risk** - the Fund may be exposed to currency risk in relation the valuation of assets held in currencies other than its base currency.
- **Stock Market Risk** – the Fund is subject to stock market risk,

which is the chance that stock prices overall, will decline. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices.

- **Country Risk**- The value of the Fund's assets may be affected by uncertainties such as changes in a country's government policies, taxation, restrictions on foreign investment, currency decisions, applicable laws and regulations, together with any natural disasters or political upheaval, which could weaken a country's securities markets.
- **Settlement Risk** - reliability of trading and settlement systems may not be the same as more developed markets, resulting in delays in receiving proceeds when selling shares.
- **Markets Risk** – investing in emerging market securities involves a higher degree of risk. Such risks may include but are not limited to political, economic and social instability, small market sizes with limited liquidity and less developed legal structures.
- **Investment in Collective Investment Schemes Risk** – the Fund is exposed to the price movements and risks at the level of the underlying collective investment schemes in which it invests. By investing in the Fund, investors will indirectly bear the fees and expenses charged by the underlying schemes in addition to the Fund's direct fees and expenses.

Charges for the Fund

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

| | |
|--------------|-------|
| Entry charge | 0.00% |
| Exit charge | 0.00% |

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

| | |
|-----------------|-------|
| Ongoing charges | 0.72% |
|-----------------|-------|

Charges taken from the Fund under certain specific conditions

| | |
|-----------------|-----|
| Performance Fee | N/A |
|-----------------|-----|

The Exit and Entry charges shown are maximum figures, and in some cases an investor may pay substantially less, or there will be no charges at all. You can find out the actual entry and exit charges from your financial advisor, distributor or the Manager.

The ongoing charges figure is an estimate based on a projection of the expenses of the Fund for the first twelve months of operation of the Fund, which includes estimates of any sales charges and ongoing charges which may be levied by the underlying collective undertakings into which the Fund invests.

This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another UCITS or collective investment undertaking.

You can find more details about the charges in the section of the Fund's Prospectus entitled Fees and Expenses.
