The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Laurium Enhanced Growth Hedge Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV ("THE ICAV")

ISIN: IE0003XPPGN0, Share Class: B8 ZAR. This Fund is managed by Prescient Fund Services (Ireland) Limited (The "Manager")

Objectives and Investment Policy

The Fund's investment objective is to provide consistent real returns to investors over the long-term.

The Fund aims to achieve its investment objective by primarily investing in equities and equity related securities. The Fund may also invest in debt and debt related securities. The Fund will gain exposure to these securities primarily through direct investment but may also invest indirectly in such securities by investing (up to 10% of its net asset value) in collective investment schemes. In addition, the Fund may invest indirectly in commodity related securities.

The equities and equity related securities (including equity securities of real estate companies) in which the Fund may will be listed or traded on Recognised Exchanges worldwide and may comprise of common stock, preference and convertible preference shares, American depository receipts and global depository receipts, equity linked notes, convertible bonds and rights. The debt and debt related securities in which the Fund may invest may include Eurobonds, fixed rate, floating rate and variable rate notes, index linked debt securities, debentures, coupon-bearing and deferred interest instruments and convertible bonds. Such debt and debt related securities may be fixed or floating rate, corporate or government issued and may be investment grade, sub-investment grade or unrated. In addition, the Fund may gain indirect exposure to commodities through the use of exchange traded commodities, exchange traded notes or exchange traded funds, and such exposure will not exceed 20% of its net asset value.

In selecting investments for the Fund, the Investment Manager uses a combination of extensive top-down macro-economic research blended with bottom-up value biased stock selection. The Investment Manager seeks to identify companies whose share prices differ materially from the Investment Manager's intrinsic valuations, based on longer term cash flows and earnings. The Investment Manager also seeks to identify and take advantage of economic cycles and market trends with a view to

generating superior long-term investment returns for investors. In addition, broker research and daily news-flow are closely monitored.

Once an investment idea is selected for in-depth analysis, it will be analysed in terms of what the Investment Manager considers to be the three key building blocks of fundamental analysis: business assessment, financial analysis and valuation. The Investment Manager may take long and short stock positions, based on conviction of view, risk assessment and price targets.

The Fund may also hold cash or ancillary liquid assets in certain circumstances including pending investment of subscription monies or income, in anticipation of future redemptions or as a defensive position in adverse market conditions. The Fund may hedge currency exposure arising from security positions held by the Fund. The Fund may be exposed to all currencies (both OECD and non-OECD, including emerging markets), through both purchases and sales of securities.

The Fund may use financial derivative instruments (swaps, futures, options and forwards) for investment and efficient portfolio management purposes (including hedging purposes), subject to the conditions and within the limits laid down by the Central Bank. The Fund will typically invest in the South African market, but may take exposure to other jurisdictions as determined by the Investment Manager. There is no sectoral bias intended. The Fund is actively managed and its portfolio is not constrained by reference to any index or benchmark. Any income arising from the Fund will be reinvested and it is not intended that the Fund will pay dividends. You may buy and sell shares in the Fund on each Business Day in Ireland.

Unless otherwise defined in this document, all words and expressions defined in the ICAV's current Prospectus shall have the same meaning herein. Please refer to the "Investment Objectives and Policies" section of the Prospectus and the "Investment Objective and Policy" section of the Supplement for further information.

Risk and Reward Profile of the Fund

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The Fund is classified in the category indicated above due to the past behaviour of its target asset mix. The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Equity Investment** - Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

- **Currency Risk** - the Fund may be exposed to currency risk in relation the valuation of assets held in currencies other than its base currency.
- **Market Risk** - the Fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company or its industry or the economy in which it operates.
- **Foreign Investment** – Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.
- **Emerging Market Risk** – Investing in emerging market securities involves a higher degree of risk. Such risks may include but are not limited to political, economic and social instability, small market sizes with limited liquidity and less developed legal structures.
- **Geographic / Sector** - For investments primarily concentrated in specific countries, geographic regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Charges for the Fund

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	0.32%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	0.00%
-----------------	-------

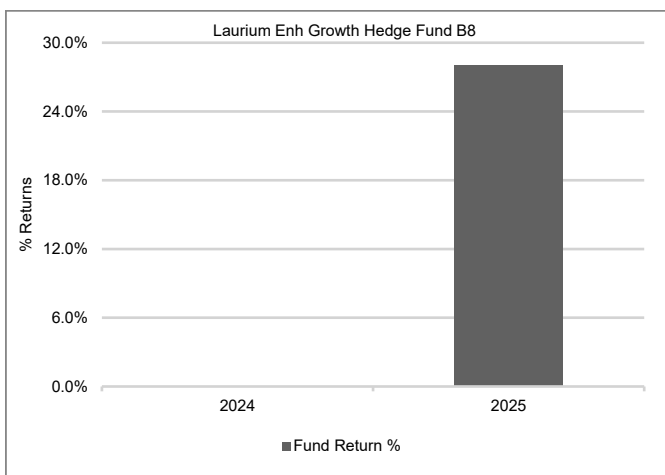

The Exit and Entry charges shown are maximum figures, and in some cases an investor may pay substantially less, or there will be no charges at all. You can find out the actual entry and exit charges from your financial advisor, distributor or the Manager.

The ongoing charges figure is an estimate based on a projection of the expenses of the Fund for the first twelve months of operation of the Fund, which includes estimates of any sales charges and ongoing charges which may be levied by the underlying collective undertakings into which the Fund invests.

This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another UCITS or collective investment undertaking.

You can find more details about the charges in the section of the Fund's Prospectus entitled Fees and Expenses.

Past Performance

The chart shows the Fund's annual performance in ZAR for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end.

The Fund was launched in 2024 and this share class was launched in 2024.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Past performance is based on the net asset value (NAV) of the Fund and is not a reliable indicator of future results.
