

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Osmosis Developed Core Equity Fossil Fuel Transition (CCF) Fund (the "Sub-Fund")

a sub-fund of Osmosis UCITS CCF (the "CCF")

Class D Units ISIN:

The Sub-Fund is authorised in Ireland and regulated by The Central Bank of Ireland. This product is managed by Osmosis Investment Management UK Limited, a member of Prescient Fund Services (Ireland) Limited (the "Manager"), which is authorised in Ireland and supervised by the Central Bank of Ireland. For more information on this product, please refer to www.prescient.ie or call +353 1 676 6959. You are about to purchase a product that is not simple and may be difficult to understand. This document is accurate as of 05 August 2026.

What is this product?

Type

This product is a type of open-ended collective investment scheme, specifically, a sub-fund of the CCF which is an umbrella common contractual fund with segregated liability between sub-funds. This product is authorised by the Central Bank as a UCITS pursuant to the UCITS Regulations. Your investment will take the form of units in the Sub-Fund.

Objectives

Term The Sub-Fund does not have a maturity date. The Manager is not entitled to terminate the Sub-Fund unilaterally. Termination of the Sub-Fund is only possible in those cases expressly provided for in the Prospectus or the Supplement of the Sub-Fund.

Investment objective The Sub-Fund's goal is to achieve growth of the Sub-Fund's value in the medium to long term and to outperform the MSCI World Developed Index (the "Benchmark").

The Sub-Fund promotes environmental characteristics and as such is a financial product referred to in Article 8 of the Sustainable Finance Disclosures Regulation.

Investment Policies The Sub-Fund invests in shares of large companies, which may be located in developed countries worldwide, excluding those directly involved within the fossil fuels industry.

The Investment Manager selects stocks of companies using the Osmosis Model of Resource Efficiency (the "MoRE Model"). The MoRE Model has been developed by the Investment Manager to rate companies on resource efficiency by compiling information on energy, waste and water. The Sub-Fund has a global investment strategy, with no particular target in relation to any industrial, geographic or other market sectors.

The Sub-Fund may also invest up to 10% of its net asset value in cash equivalents and money market instruments. The Sub-Fund may also invest up to 10% of its net asset value in collective investment schemes.

The Sub-Fund may use Financial Derivatives for investment

purposes and efficient portfolio management, including hedging.

The Sub-Fund's base currency is US dollars. The class currency for this Unit Class is USD.

Portfolio transaction costs may have an impact on the Sub-Fund's performance. Portfolio transaction costs are paid out of the assets of the Sub-Fund, in addition to the charges set out below.

This Sub-Fund is actively managed in reference to the Benchmark by virtue of the fact that the investment objective of the Sub-Fund is to outperform the Benchmark. The Investment Manager has discretion to invest in securities not included in the Benchmark at any time in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Sub-Fund's holdings may deviate from the Benchmark. This deviation may be material.

Benchmark The benchmark of this sub-fund is MSCI World Developed Index.

Redemption and Dealing You can buy, redeem and/or exchange units on each business day on which banks in Ireland and England are generally open for business provided that all the required documentation has been furnished and received by the Administrator.

Distribution policy There are no distributions.

Intended retail investor

The Sub-Fund is intended for informed investors that seek capital appreciation through broad based global equity exposure and are willing to accept a medium level of risk and a medium to long investment horizon.

Practical information

Depository Northern Trust Fiduciary Services (Ireland) Limited

Further information A copy of the Prospectus, the latest annual and semi-annual financial report in English and the latest NAV per unit are available free of charge at www.prescient.ie.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the

product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

This sub fund is highly liquid and can be liquidated under 1 day.

Performance Scenarios

The figures shown include all the costs of the product itself, and the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period Example Investment Scenarios	5 years USD 10 000	If you exit after 1 Year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	4 773.2 USD	3 391.3 USD
	Average return each year	-52.27%	-19.45%
Unfavourable	What you might get back after costs	7 163.0 USD	7 991.0 USD
	Average return each year	-28.37%	-4.39%
Moderate	What you might get back after costs	9 969.5 USD	13 608.0 USD
	Average return each year	-0.30%	6.36%
Favourable	What you might get back after costs	16 302.7 USD	19 637.0 USD
	Average return each year	63.03%	14.45%
Death Scenario Insured event	What your beneficiaries might get back after costs?	USD	USD

Unfavourable scenario: This type of scenario occurred for an investment between (01/2022 - 10/2023).

Moderate scenario: This type of scenario occurred for an investment between (02/2018 - 02/2023).

Favourable scenario: This type of scenario occurred for an investment between (11/2016 - 11/2021).

The aforementioned calculations were performed using benchmark MSCI World Developed index

What happens if Osmosis Investment Management UK Limited is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In worst case, however, you would lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested.

Investment USD 10 000 Scenarios	If you exit after 1 Year	If you exit after 5 years
Total Costs	23 USD	115 USD
Annual Cost impact(*)	.23%	.23 % each year

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

The Exit charges shown are maximum figures, and in some cases an investor may pay substantially less, or there will be no charges at all.

Composition of costs

One-off costs upon entry or exit	If you exit after 1 year
Entry costs	The Entry charges shown are maximum figures. 0 USD

Exit costs	The Exit charges shown are maximum figures.	0 USD
Ongoing costs taken each year		
Management fee and other administrative or operating costs	The Manager shall be entitled to receive out of the assets of the Sub-Fund (i) a monthly fee, exclusive of VAT (if applicable) of USD 5,000, which is accrued daily and payable monthly (the "Fixed Component") plus (ii) an annual management fee as detailed below, accrued and calculated at each Valuation Point (the "Variable Component"). From USD 0 to USD 250 million* = 0.020%. From and above USD 250 million = 0.015%. *The Manager is entitled to increase its fees per annum up to a maximum of 2.00% of the Net Asset Value attributable to each Class. Unitholders will be notified in writing in advance of any proposed increase of such fees up to such maximum.	2 USD
Transaction costs	0.03% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	.03 USD
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee.	0 USD

How long should I hold it and can I take my money out early?

Recommended holding period: 5 Years

This product is designed for longer term investments; you should be prepared to stay invested for at least 5.0 years.

How can I complain?

If you have any complaints, you can contact us on www.prescient.ie
