Seed Global Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV ("THE ICAV")

ISIN: IE00BYX7RD72 , Share Class: B USD

This Fund is managed by Prescient Fund Services (Ireland) Limited (The "Manager")

Objectives and Investment Policy

The Fund's objective is to achieve returns in excess of its Benchmark, the ICE Libor 1 Month USD +3% per annum.

The objective is achieved mainly through investing in a range of equities (e.g. shares), equity related investments such as preferred stocks, collective investment schemes, real estate investment trusts, property funds, private equity funds, exchange traded funds, which may be located or hold assets located in developed and emerging countries worldwide. The Fund may invest up to 30% of its net assets in equities and equity related securities (such as warrants, rights issues and preferred stocks) in emerging markets, which in investment terms are those economies that are still developing. It may also from time to time hold ancillary liquid financial assets including debt securities (e.g. government, municipal, corporate and securitized debt and money market instruments) (as described above) in appropriate circumstances. Such circumstances may include where market conditions may require a defensive investment strategy, the holding of debt securities and/or money market instruments pending reinvestment, the holding of debt securities and/or money market instruments in order to meet redemptions and payment of expenses

Investments will be made for the Fund based on Strategic Asset Allocation and tactical allocation. The Investment Manager can make investments for the Fund at its own discretion. The Fund may also invest in global currencies. The currencies chosen by the Fund will mainly be with stable economies to reduce risk. The Fund has a global investment strategy, with no particular target in relation to any

industrial, geographic or other market sectors. The Fund may invest in bonds and other debt securities when market conditions require a more defensive strategy. 90% of such investments will have a credit rating of "investment grade" at the time of investment.

The Fund's performance is measured against the ICE Libor 1 Month USD +3% per annum. The ICE (Intercontinental Exchange Inc.) Libor (London Interbank Offered Rate) provides an indication of the average rate at which a bank can obtain unsecured funding in the London Interbank market for a given period, in a given currency.

This Fund is actively managed in reference to the Ice Libor 1 Month USD Index actively by virtue of the fact that the investment objective of the Fund is to outperform the Benchmark.

Any income arising from the Fund will be reinvested and it is not intended that the Fund will pay dividends.

You may buy and sell shares in the Fund on each Business Day in both Dublin, Ireland and Cape Town, South Africa.

Unless otherwise defined in this document, all words and expressions defined in the Company's current Prospectus shall have the same meaning herein. Risk and Reward Profile of the Fund

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The Fund is classified in the category indicated above due to the past behaviour of its target asset mix.
- The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Currency Risk** - the Fund may be exposed to currency risk in relation to the valuation of assets held in currencies other than USD.
- Additionally, the Fund's investments in Emerging Markets may be exposed to the following risks:
 - **Political Risk** - the investments may be affected by uncertainties such as political or diplomatic developments, social and religious instability, or changes in government policies, tax and interest rates.
 - **Settlement Risk** - reliability of trading and settlement systems may not be the same as more developed markets, resulting in delays in receiving proceeds when selling shares.
 - **Liquidity Risk** - certain stockmarkets have low liquidity which means it may be more difficult to buy or sell shares than on a more developed market.
 - **Currency Risk** - the fund may be exposed to higher risk if holding assets in currencies which fluctuate significantly over a short period of time.
 - **Accounting Standards Risk** - Companies in emerging markets may not be subject to similar accounting standards to major markets, so there is a risk that their value could fluctuate significantly.
 - **Custodial Risk** - custody services may be underdeveloped, meaning that a Fund may have difficulties in establishing ownership of some investments, so could suffer losses as a result.
