

Key Investor Information

This document provides you with key investor information about the PortfolioMetrix Cautious Fund (the “Fund”). It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

PortfolioMetrix Cautious Fund

a sub-fund of PRESCIENT GLOBAL FUNDS ICAV (THE “ICAV”)

(ISIN: IE00BHZSHX92 Share Class: Class B EUR)

This Fund is managed by Prescient Fund Services (Ireland) Limited (The “Manager”)

The Fund has as its primary objective the generation of capital growth and income over the medium to long term.

To achieve its objective, the Fund may invest up to 100% of its net assets (primarily through indirect investment in underlying collective investment schemes) in a diversified portfolio of global equities and equity-related securities, global debt and debt-related securities and global real estate.

The type of underlying schemes in which the Fund will invest will be UCITS and alternative investment funds, which are eligible for investment by a UCITS in accordance with the requirements of the Central Bank.

The collective investment schemes referred to above are selected upon the completion of a thorough due diligence process, which will include both qualitative (i.e. analysis that uses subjective judgment such as investment team expertise, investment process and investment philosophy) and quantitative analyses (i.e. historic performance analysis and other quantifiable metrics).

Equities and equity-related securities shall comprise equities, certificates of deposit, preferred stocks and warrants, as well as depository receipts for such securities.

Debt and debt-related securities shall comprise global fixed income securities, floating rate, variable rate bonds and notes, index linked debt securities, debentures, coupon-bearing and deferred interest instruments, which are issued by corporations and governments and may be listed and unlisted, investment grade or below investment grade and rated or unrated (provided that the Fund will not invest more than 30% of the Net Asset Value in below investment grade debt securities).

Investment in global real estate will only be made indirectly through investment in collective investment schemes.

The Fund may also from time to time hold ancillary liquid financial assets including short term debt securities (e.g. fixed and floating rate bonds and notes, government, municipal, corporate and securitized debt) and money market instruments (such as treasury bills, certificates of deposit, commercial paper and bankers' acceptances), which are issued by governments or corporations and have a credit rating or an implied credit rating of “investment grade” at the time of investment by

Risk and Reward Profile of the Fund

The risk indicator is determined using historical data or, where historical data is not available, using simulated historical data. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target or a guarantee and may change over time. A category 1 fund is not risk free, the risk of loss is small but the chance of making gains may also be limited. With a category 7 fund, the risk of losing money is high but so also is the possibility of making gains. **The risk indicator for the Fund is set at 3 as this reflects the market risk arising from proposed investments.**

The Fund does not offer any capital guarantee or assurance that the investor will receive a fixed amount when redeeming.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- Market Risk - the Fund invests in units of collective investment schemes, and the value of these units can be negatively affected by changes in the fund or its industry or the economy in which it operates.
- Operational Risk / Third Parties - investments in other funds

Standard & Poors, Moody's or Fitch Ratings Limited.

The Fund will have a global focus and there will be no geographic or sectoral bias. The Fund may not have exposures in excess of 20% of net assets in emerging markets.

The Fund is considered to be actively managed in reference to the Benchmark by virtue of the fact that it uses the Benchmark for performance comparison purposes. However, the Benchmark is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the Benchmark

The Fund may utilise financial derivative instruments (futures contracts and forwards contracts with respect to equities, debt securities, currencies, interest rates and indices) for efficient portfolio management and hedging purposes in accordance with the conditions and limits of the Central Bank. Derivatives may be traded on a recognised exchange or over-the-counter. The Fund may also invest in global currencies for efficient portfolio management purposes.

Any income arising from the Fund will be reinvested and it is not intended that the Fund will pay dividends.

The Fund employs a medium to long-term investment approach and is suitable for investors who have a low risk profile.

You may buy and sell shares in the Fund on each business day in Ireland on which banks in Ireland are open for business.

have direct and indirect dependence on other service providers. The Fund may suffer disruption or loss in the event of their failure.

- Liquidity Risk (Fund of Funds) - investments in other funds are subject to the liquidity of those underlying funds. If underlying funds suspend or defer payment of redemption proceeds, the funds ability to meet redemption requests may also be affected.
- Credit Risk - the Fund's fixed income and cash investments have the risk that a borrower will not honour its obligations and this will result in losses for the investor.
- Currency Risk - the Fund may be exposed to currency risk in relation to the valuation of assets held in currencies other than its base currency.
- Liquidity Risk - the risk stemming from the lack of marketability of an investment that cannot be bought or sold quickly enough to prevent or minimise a loss.
- Derivatives Risk - Derivatives are highly sensitive to changes in the value of the assets they are based on. The use of derivatives may result in gains or losses that are greater than the original amount invested.

Please refer to the “Risk Factors” sections of the Prospectus and the Supplement for further information - see under “Practical Information” for how to obtain a copy.

Charges for the Fund

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	Nil
Exit charge	3.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	1.02%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	None
-----------------	------

The Exit and Entry charges shown are maximum figures, and in some cases an investor may pay substantially less, or there will be no charges at all. You can find out the actual entry and exit charges from your financial advisor, distributor or the Manager of the Fund.

The ongoing charges figure is an estimate based on a projection of the expenses of the Fund for the first twelve months of operation of the Fund, which includes estimates of any sales charges and ongoing charges which may be levied by the underlying collective undertakings into which the Fund invests.

This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another UCITS or collective investment undertaking.

In most circumstances there will be no redemption fee but the Fund has discretion to charge a redemption fee up to 3% of the NAV per share where there is an attempt of arbitrage on the yield of Shares in the Fund

You can find more details about the charges in the section of the Prospectus entitled "Fees and Expenses".

Past Performance

The chart shows the Fund's annual performance in EUR for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end.

The Fund was launched in 2019 and shares in this class were issued in 2019.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Past performance is based on the net asset value (NAV) of the Fund and is not a reliable indicator of future results.
