

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Flexible Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV ("THE ICAV")

ISIN: IE00BJX8KF85 , Share Class: D GBP. This Fund is managed by Prescient Fund Services (Ireland) Limited (The "Manager")

Objectives and Investment Policy

The Fund has as its primary objective to generate returns in excess of the United States Consumer Price Index for All Urban Consumers: All Items Less Food & Energy (the "US CPI") + 3% per annum (Bloomberg ticker: CPI YOY Index) (the "**Benchmark**"), which is an aggregate of prices paid by urban consumers for a typical basket of goods, excluding food and energy.

To achieve its objective, the Fund may invest up to 100% of its net assets (primarily through investment in underlying collective investment schemes) in a diversified portfolio of securities listed on Recognised Exchanges, including global equities and equity-related securities (such as common stock, preference shares and real estate investment trusts), debt and debt-related securities (such as investment grade fixed or floating rate bonds issued by corporations, governments and municipal debt (i.e. a debt security issued by a state, municipality or country), securitised debt (e.g. mortgage backed securities) and commodity related securities such as exchange traded commodities and exchange traded notes.

The type of underlying collective investment schemes in which the Fund will invest will be UCITS and/or alternative investment funds, which are eligible for investment by the Fund in accordance with Central Bank requirements.

The Fund may invest directly or indirectly in currencies (both OECD and non-OECD) to take exposure for investment purposes. It may also hold high levels of cash for cash management purposes.

The Fund may use financial derivative instruments for efficient portfolio management, including for hedging purposes.

The Fund may also from time to time directly hold ancillary liquid assets, including money market instruments. Up to 100% of net assets may be invested in money market instruments including certificates of deposit, treasury bills, fixed or floating rate notes and commercial paper (which are considered investment grade or above as rated by the principal rating agencies), fixed and floating rate government bonds, securities issued by supranational organisations and agencies and fixed or floating rate corporate bonds, rated at least BBB- (long term) and A-2 (short term) by Standard & Poor's (or equivalent).

Risk and Reward Profile of the Fund

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The Fund is classified in the category indicated above due to the past behaviour of its target asset mix. The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Credit Risk** - the Fund's fixed income and cash investments have the risk that a borrower will not honour its obligations and this will result in losses for the investor.
- **Market Risk** - the Fund invests in units of collective investment schemes, and the value of these units can be negatively affected by changes in the fund or its industry or the economy in which it

operates.

- **Currency Risk** - the Fund may be exposed to currency risk in relation to the valuation of assets held in currencies other than USD.
- **Liquidity Risk** - the risk stemming from the lack of marketability of an investment that cannot be bought or sold quickly enough to prevent or minimise a loss.
- **Operational Risk / Third Parties** - investments in other funds have direct and indirect dependence on other service providers. The Fund may suffer disruption or loss in the event of their failure.
- **Liquidity Risk (Fund of Funds)** - investments in other funds are subject to the liquidity of those underlying funds. If underlying funds suspend or defer payment of redemption proceeds, the funds ability to meet redemption requests may also be affected.

Charges for the Fund

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	3.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	1.50%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	0.00%
-----------------	-------

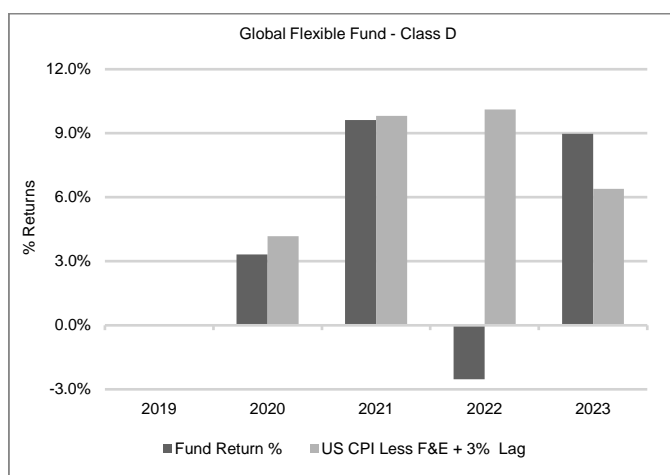

Exit and Entry charges shown are maximum figures, and in some cases an investor may pay substantially less, or there will be no charges at all. You can find out the actual entry and exit charges from your financial advisor, distributor or the Manager of the Fund.

There is no charge for switching between sub-funds up to a maximum of four times per annum. Shareholders who switch on more than four occasions per annum may be subject to a charge of Euro 40 per switching transaction.

The ongoing charges figure is an estimate based on a projection of the expenses of the Fund for the first twelve months of operation of the Fund. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another UCITS or collective investment undertaking.

You can find more details about the charges in the section of the Fund's Prospectus entitled Fees and Expenses.

Past Performance

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end.

The Fund was launched in 2019 and shares in this class were issued in 2019.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Past performance is based on the net asset value (NAV) of the Fund and is not a reliable indicator of future results.
