27Four Global Balanced Fund of Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV ("THE ICAV")

ISIN: IE00BCZQBQ94 , Share Class: A USD

This Fund is managed by Prescient Fund Services (Ireland) Limited (The "Manager")

Objectives and Investment Policy

The Fund's objective is to achieve long term returns in excess of its Benchmark.

The objective is achieved through investing in collective investment schemes or exchange-traded Funds which hold a range of equities (e.g. shares), bonds issued by corporations and governments and other interest bearing securities such as certificates of deposit and money market instruments (meaning forms of debt which mature in less than one year).

The Investment Manager has discretion in managing the assets of the Fund. The collective investment schemes are selected upon the completion of a thorough due diligence. Asset allocation will tend to be higher in equities, which are chosen to deliver growth but can be reduced at the discretion of the Investment Manager.

The Fund may use derivatives to manage the risk profile of the Fund, for example to reduce the impact of price or exchange rate movements. The Fund may also invest in global currencies directly or through the use of financial derivatives. The currencies chosen by the Fund will mainly be with stable economies to reduce risk.

The Fund has a global investment strategy, with no particular target in relation to any industrial, geographic or other market sectors.

The Fund may also invest over 30% of its net assets in emerging markets, which in investment terms are those economies that are still developing.

The Fund is actively managed in reference to the composite benchmark made up of 60% of the MSCI World Index and 40% of the Merrill Lynch Global Government Bond Index by virtue of the fact that the investment objective of the Fund is to outperform the Benchmark and performance fees are calculated on out-performance of the Fund against the Benchmark. The Investment Manager has discretion to invest in securities not included in the Benchmark at any time in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Benchmark. This deviation may be material. There is a target maximum annualised tracking error of 5%.

The Fund's performance is measured against a combination of 60% MSCI World Index and 40% Merrill Lynch Global Government Bond Index.

Any income arising from the Fund will be reinvested and it is not intended that the Fund will pay dividends.

You may buy and sell shares in the Fund on each Irish Business Day.

Unless otherwise defined in this document, all words and expressions defined in the ICAV's current Prospectus shall have the same meaning herein. Please refer to the "Investment Objectives and Policies" section of the Prospectus for further information.

Risk and Reward Profile of the Fund

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The Fund is classified in the category indicated above due to the past behaviour of its target asset mix.
- The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Currency Risk** - the Fund may be exposed to currency risk in relation to the valuation of assets held in currencies other than USD.

Additionally, the Fund's fixed income investments may be exposed to the following risks:

- **Credit Risk** - the risk that a borrower will not honour its obligations and this will result in losses for the investor.
- **Liquidity Risk** - the risk stemming from the lack of marketability of an investment that cannot be bought or sold quickly enough to prevent or minimise a loss.
- **Interest Rate Risk** - the risk that impacts the price of an interest bearing security should interest rates / yields change.

Please refer to the "Risk Factors" section of the Prospectus for further information - see under "Practical Information" for how to obtain a copy.

Charges for the Fund

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	3.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	2.37%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	10% of any returns over the returns of the combined 60% MSCI World Index and 40% Merrill Lynch Global Government Bond Index.
-----------------	--

The Exit and Entry charges shown are maximum figures. It is possible that you will pay substantially less, or there will be no charges at all. You can find out the actual entry and exit charges from your financial advisor or the Manager of the Fund.

There is no charge for switching between sub-Funds up to a maximum of four times per annum.

The ongoing charges figure is based on the expenses of the year ending 31 December 2021. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry or exit charge paid by the UCITS when buying or selling units in another UCITS or collective investment undertaking. The ongoing charges figure includes the ongoing charges of the collective investment schemes or exchange-traded Funds held by the Fund.

You can find more details about the charges in the section of the Fund's Prospectus entitled Fees and Expenses.

Past Performance

The chart shows the Fund's annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end.

The Fund was launched in 2014 and this share class was launched in 2014

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Past performance is based on the net asset value (NAV) of the Fund and is not a reliable indicator of future results
