Laurium Africa USD Bond Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV ("THE ICAV")

ISIN: IE00BN2BST69, Share Class: A1 USD. This Fund is managed by Prescient Fund Services (Ireland) Limited (The "Manager")

Objectives and Investment Policy

The Fund's investment objective is to achieve long term capital growth by primarily investing in Africa (ex-South Africa) sovereign and corporate debt.

The Fund's objective may be achieved primarily through direct investment in debt and debt-related securities (including global fixed income securities, fixed or floating rate bonds issued by corporations and governments and other debt securities of governments and corporates of various types and maturities), which may be listed on global recognized exchanges or unlisted, investment grade or below investment grade, and rated or unrated, secured or unsecured. It is possible that up to 100% of the Fund may be invested in below investment grade and / or unrated debt and debt-related securities at any time.

The Fund may invest up to 10% of the Net Asset Value in global equities and equity-related securities (including equity securities of real estate companies, common stock, preference and convertible preference shares, American depository receipts and global depository receipts, equity linked notes, convertible bonds and rights), which are listed on a recognised exchange worldwide.

The Fund may also take indirect exposure to debt and equity securities by investing up to 20% of its Net Asset Value in the units and/or shares of collective investment schemes, including money market funds and ETFs (which are eligible for investment by a UCITS) in accordance with the requirements of the Central Bank. The Fund may also hold up to 20% of its Net Asset Value in cash including in currencies other than the Base Currency) or ancillary liquid assets pending re-investment of any income received from debt and debt related securities and pending investment of subscription monies or in anticipation of future redemptions.

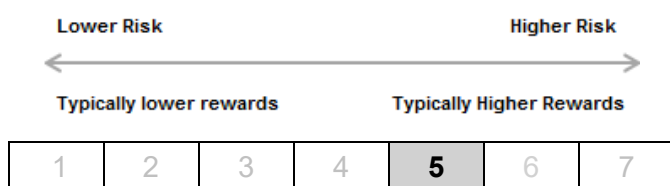

The Fund may to the extent that the security positions in the Fund are exposed to exchange rate risk, enter into financial transactions for the exclusive purpose of hedging such exchange rate risk. The Fund may be exposed to all currencies both OECD and non-OECD, through both purchases and sales of securities. The Fund will invest predominantly in US Dollar and Euro denominated securities. For cash management purposes, the Fund may also hold high levels of cash (including in currencies other than the Base Currency).

The Fund will predominantly invest in African (ex-South Africa) markets, but may also invest in non-African offshore jurisdictions from time to time.

The Fund may use financial derivative instruments (futures, options, forwards and swaps in equity, debt and currency markets) for efficient portfolio management purposes including for hedging purposes, subject to the conditions and within the limits laid down by the Central Bank. Financial derivative instruments may be traded on a recognised exchange or over-the-counter. The maximum proportion of the Fund's assets which can be subject to total return swaps is 10% of the Net Asset Value. The Fund is considered to be actively managed in reference to the Standard Bank Africa Sovereign Eurobond (excl. South Africa) Total Return Index in ZAR (the "Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes and the performance fees are calculated based on the performance of the Fund against the Benchmark. However, the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark. This Share Class will not pay a dividend. Any income arising from the Fund will be reinvested to grow the value of your investment. The Fund is suitable for investors with a medium to high risk appetite seeking long term capital growth and who also have an appetite for emerging market fixed income risk, with low volatility and a low correlation to equity markets. You may buy and sell shares in the Fund on each business day in Ireland on which banks in Ireland are open for business.

Unless otherwise defined in this document, all words and expressions defined in the Prospectus shall have the same meaning herein. Please refer to the "Investment Objectives and Policies" section of the Prospectus and the "Investment Objective and Policy" section of the Supplement for further information.

Risk and Reward Profile of the Fund

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The Fund is classified in the category indicated above due to the past behaviour of its target asset mix. The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Interest Rate Risk** – the value of the Fund's fixed income investments may change adversely due to a change in current or expected interest rates.
- **Market Risk** - the Fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company or its industry or the economy in which it operates.

- **Liquidity Risk** - the risk stemming from the lack of marketability of an investment that cannot be bought or sold quickly enough to prevent or minimise a loss.
- **Investment Risk** - There is no guarantee that the investment objective of the Fund will be achieved. A capital loss of some or all of the amount invested may occur.
- **Currency Risk** - the Fund may be exposed to currency risk in relation to the valuation of assets held in currencies other than its base currency.
- **Derivatives Risk** - Derivatives are highly sensitive to changes in the value of the assets they are based on. The use of derivatives may result in gains or losses that are greater than the original amount invested.
- **Counterparty Risk** - The insolvency of any institutions providing services, such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- **Developing Market Risk** – Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. In particular, investing in African countries involves certain risks and special considerations not typically associated with investing in other more established economies or securities markets. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed

Charges for the Fund

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charges	1.17%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	10% of the difference between (i) the daily cumulative percentage movement of the Net Asset Value per Share of the Share Class (after deduction of all other fees and expenses); and (ii) the daily cumulative performance of the Benchmark.
-----------------	--

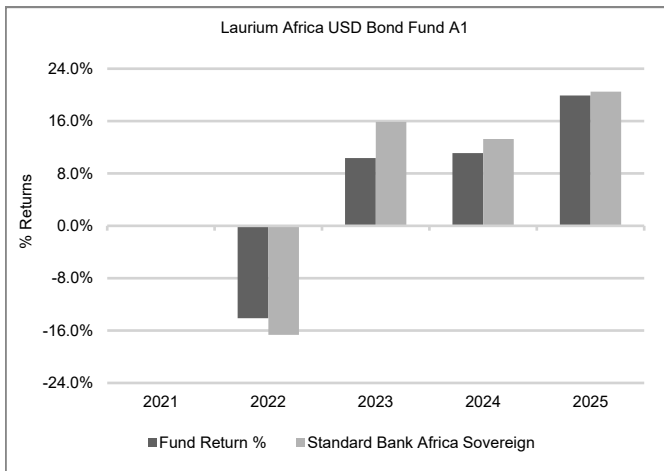

The Exit and Entry charges shown are maximum figures, and in some cases an investor may pay substantially less, or there will be no charges at all. You can find out the actual entry and exit charges from your financial advisor, distributor or from Prescient Fund Services (Ireland) Limited (the "Manager").

The ongoing charges figure is an estimate based on a projection of the expenses of the Fund for the first twelve months of operation of the Fund, which includes estimates of any sales charges and ongoing charges which may be levied by the underlying collective undertakings into which the Fund invests.

This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another UCITS or collective investment undertaking.

You can find more details about the charges in the section of the Fund's Prospectus entitled Fees and Expenses.

Past Performance

The chart shows the Fund's annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end.

The Fund was launched in 2021 and this share class was launched in 2021.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Past performance is based on the net asset value (NAV) of the Fund and is not a reliable indicator of future results.
