The fees payable to the Depositary are set out in the section in the Prospectus headed “Fees and Expenses”.

Risk Factors

The attention of investors is drawn to the section headed “Risk Factors” in the Prospectus. In addition, investors’ attention is drawn to the following risks, which are specific to the Fund:

Foreign Investment

Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Currency Exchange

Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Geographic / Sector

For investments primarily concentrated in specific countries, geographic regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Equity Investment

Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Emerging Markets

The Fund may invest in emerging markets (as disclosed below under the heading “*Investment Objective and Policy*”) and is, therefore, subject to the risks of investing in emerging markets generally (as more fully described under the heading “*Emerging Markets*” in the section of the Prospectus entitled “*Risk Factors*”).

Sustainability Risk

The Investment Manager recognises that Sustainability Risks could have an impact on the performance of the Fund’s underlying investments, and as such, its investment process takes Sustainability Risks into consideration.

When assessing the Sustainability Risk associated with underlying investments, the Investment Manager is assessing the risk that the value of such underlying investments could be materially negatively impacted by an environmental, social or governance event or condition (“**ESG Event**”).

Sustainability Risk is identified, monitored, and managed by the Investment Manager in the following manner:

The Investment Manager seeks to integrate Sustainability Risk considerations into its research and overall investment decisions. The Investment Manager's integration approach spans the breadth of the investment process, from identifying trends, analysing securities, constructing portfolios, through to engagement, voting and reporting. The Investment Manager considers investment decisions in a wider context and considers a range of risks and opportunities related to ESG drivers. Third party service providers such as MSCI ESG and Sustainalytics are used to assess ESG risks and ratings. This can lead to a broader assessment of the environment in which companies operate and their performance in managing different risks, giving a better understanding of future opportunities and risks.

The Investment Manager has determined that the Sustainability Risk (being the risk that the value of the Fund could be materially negatively impacted by an ESG Event) faced by the Fund is low.

Taxonomy Regulation

The Fund does not have as its objective sustainable investment, nor does it promote environmental or social characteristics. As a result, the Fund does not fall within the scope of Article 5 or Article 6 of Regulation (EU) 2020/852 of the European Parliament and of the Council on the establishment of a framework to facilitate sustainable investment. The investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Profile of a Typical Investor

The Fund is suitable for investors seeking long-term capital growth by investing in a diversified portfolio of global equities.

Investment objective and policy

Investment Objective

The investment objective of the Fund is to maximise capital growth by investing directly or indirectly in equities and equity-related securities.

There is no guarantee that the objective will be met or that a positive return will be delivered over any time period.

Investment Policy

The Fund aims to achieve its objective by investing in global equity and equity-related securities, as further set out under "Investment Strategy" below.

The Fund will gain exposure to these companies primarily through direct investment in securities of such companies but may also invest indirectly in such securities through investment via collective investment schemes (subject to the limits set out below).

Equity and Equity-Related Securities

The Fund may invest up to 100% of the Net Asset Value of the Fund in equities and equity-related securities comprising common stock, preference and convertible preference shares, as well as depository receipts for such securities. The equities and equity-related securities invested in by the Fund will be listed or traded on Recognised Exchanges worldwide.

Collective Investment Schemes

Up to 10% of the Net Asset Value of the Fund may be invested, in aggregate, in one or more open-ended collective investment schemes (including exchange traded funds). The Fund may invest in other sub-funds of the ICAV and / or collective investment schemes managed by the Manager / Investment Manager or any other company with which the Manager or Investment Manager is linked by common management or control or by a substantial direct or indirect holding. The Fund will invest in such schemes primarily when such investment is consistent with the Fund's primary investment focus.

Ancillary Liquid Assets and Cash Management

Although it will be normal investment policy of the Fund to deploy its assets as detailed above, the Fund may also hold cash or ancillary liquid assets (comprising short-term money market instruments including, but not limited to, non-bespoke fixed or floating rate notes and fixed or variable rate commercial paper (which are considered investment grade or above as rated by the principal rating agencies) and other types of debt securities (such as fixed and floating rate bonds)), which will be listed on a Recognised Exchange, and cash equivalents such as certificates of deposit and cash deposits denominated in such currency or currencies as the Investment Manager may determine.

Such debt securities held as ancillary liquid assets and referred to above will be issued by governments or corporations and will have a credit rating or an implied credit rating of "investment grade" at the time of investment by Standard & Poor's, Moody's or Fitch Ratings Limited.

Cash and ancillary liquid assets may be held for cash management purposes, as a defensive strategy in falling equity markets and pending investment of subscription monies or in anticipation of future redemptions. The amount of cash and/or ancillary liquid assets that the Fund will hold will vary depending on the foregoing circumstances set out in this paragraph, however, it is possible that up to 20% of the Net Asset Value of the Fund may be held in cash or ancillary liquid assets at any time.

Currency Exposure

The Fund may hedge currency exposure arising from security positions held by the Fund. The Fund may be exposed to all currencies (both OECD and non-OECD, including emerging markets), through both purchases and sales of securities.

Geographic, Market and Sector Focus

Investments will have a global focus insofar as investments are not confined or concentrated in any particular geographic region or market.

There is no geographic, industry or sectoral bias intended. The Fund's exposure to emerging markets will not exceed 50% of its Net Asset Value. In this regard, an emerging market shall constitute any country which is designated as an emerging market country within MSCI ACWI Index (USD).

Benchmark

The Fund is actively managed in reference to, and seeks to achieve outperformance of, the Benchmark. Whilst the Benchmark is used as an initial indicative universe from which to select stocks and is utilised to monitor certain risk indicators (as further described in the "*Investment Strategy*" section below), the Investment Manager has broad discretion with respect to individual stock selection and may invest in securities that are not included in the Benchmark.

Investment Strategy

In selecting investments for the Fund, the Investment Manager seeks to understand a company's underlying business and to determine the intrinsic value of the company, with a view to identifying favourable investment opportunities and generating positive long-term returns for investors. As part of this process, the Investment Manager considers the strength of a company's financial position by analysing its balance sheet, income statement, revenues and margins, profit / earning ratios and free cashflow yield over an extended period. In addition, the Investment Manager reviews the quality of the business, considering structural changes over the history of a business (e.g. acquisitions, disposals or reinventions), any changes in capital structures and a company's business cycles. The Investment Manager continuously reviews and monitors new company information and the industry dynamics in which the company's business operates (i.e. if the industry in question is on an upward or downward trend, the demand for products in that industry and other relevant factors that will impact prices in that industry) to determine its intrinsic value and the price points at which it would be favourable to buy or sell. The Investment Manager seeks to identify investment opportunities in circumstances where companies may be going through a period of poor performance but where the business and/or industry cycle may be turning, or where a business may experience new growth opportunities.

The Investment Manager takes a long-term approach to investing, with a typical investment horizon of three to five years. Outperformance in the long term is driven by focusing on the long-term intrinsic value of a business instead of analysing short-term performance which can be driven primarily by market sentiment and news flow rather than the underlying intrinsic value of the business.

The Investment Manager seeks to have a highly diversified global equity portfolio for the Fund, consisting of approximately 200 stocks, thereby providing a low concentration risk portfolio. The

Investment Manager also analyses sector and country weights to ensure diversification and that the portfolio is in line with the risk profile of the Fund (i.e. the level of risk versus reward for the Fund). The sector and country weightings of the Benchmark and consideration of macroeconomic factors will be used for this analysis. The main macroeconomic factors that the Investment Manager will focus on are growth rates, inflation levels, interest rates, exchange rates, indebtedness of a country, fiscal and monetary policies, political and economic stability, employment levels, demographic makeup and commodity prices.

Securities Financing Transactions

The Fund does not intend to use repurchase agreements, reverse repurchase agreements, securities lending agreements or total return swaps.

Global Exposure and Leverage

The Fund's global exposure (as prescribed in the Central Bank UCITS Regulations) shall not exceed 100% of its Net Asset Value and will be measured using the commitment approach.

Borrowings

Borrowings on behalf of the Fund may only be made on a temporary basis and the aggregate amount of such borrowings may not exceed 10% of the Net Asset Value of the Fund. The Fund may borrow to meet redemption requests.

The investment and borrowing restrictions for the Fund are set out in the main body of the Prospectus.

Confirmed cleared funds must be received by no later than one Business Day after the relevant Dealing Day or such later deadline as the Manager may from time to time permit in accordance with the requirements of the Central Bank

provided that, without prejudice to the Manager's ability to cancel subscriptions in the event of non-clearance of funds as set out in the Prospectus, the Manager also reserves the right to defer the issue of Shares until receipt of subscriptions monies by the Fund. All such subscriptions will be dealt with on a forward pricing basis (i.e. by reference to the Subscription Price for Shares calculated as at 5:00pm (New York time) on the relevant Dealing Day).
