High Street Wealth Warriors Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV ("THE ICAV")

ISIN: IE00BD1K6M34, Share Class: A USD. This Fund is managed by Prescient Fund Services (Ireland) Limited (The "Manager")

Objectives and Investment Policy

The Fund's objective is to achieve long term growth through active stock selection.

The objective is achieved mainly through investing in a range of equities (e.g. shares), bonds, property and infrastructure related securities (e.g. listed real estate investment trusts), exchange traded funds, collective investment schemes, and cash.

The Fund may invest up to 100% of its net assets in equities (e.g. shares) at any time.

The Fund may invest in both developed and emerging markets, subject to a limit of 20% of net assets in emerging market countries which in investment terms are those economies that are still developing.

The Fund may use derivatives to manage the risk profile of the Fund, for example to reduce the impact of price or exchange rate movements, or to gain exposure to the asset classes referred to above.

The Fund may also invest in global currencies directly or through the use of financial derivatives. The currencies chosen by the Fund will mainly be with stable economies to reduce risk. The Fund may hold high levels of cash, money market instruments (e.g. commercial paper) and cash equivalents (e.g. certificates of deposit) for cash management purposes.

High Street Asset Management (PTY) Limited (the "Investment Manager") can make investments for the Fund at its own discretion within the predefined investment limits.

The Fund's performance is measured against the iShares MSCI World Index ETF (the "Benchmark"). The Benchmark tracks the investment results of an underlying index, the MSCI World Index (the "Underlying Index") composed of developed market equities.

This Fund is actively managed in reference to the Benchmark by virtue of the fact that the investment objective of the Fund is to outperform the Benchmark. The majority of the Fund's securities will be components of the Benchmark. The Investment Manager has discretion to invest in securities not included in the Benchmark at any time in order to take advantage of investment opportunities.

Any income arising from the Fund will be reinvested and it is not intended that the Fund will pay dividends.

The Fund employs a long-term investment approach and a holding period of at least 3 years is suggested.

You may buy and sell shares in the Fund on each Business Day in Dublin, Ireland.

Unless otherwise defined in this document, all words and expressions defined in the current Prospectus shall have the same meaning herein. Please refer to the "Investment Objectives and Policies" section of the Prospectus and the "Investment Objective and Policy" section of the Supplement for further information.

Risk and Reward Profile of the Fund

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The Fund is classified in the category indicated above due to the past behaviour of its target asset mix. The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Currency Risk** - the Fund may be exposed to currency risk in relation to the valuation of assets held in currencies other than USD.
- **Market Risk** - the Fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company or its industry or the economy in which it operates.

- **Regulatory Risk** – the Fund invests in companies in industries that are driven by innovation and technological advancement, so the value of the shares can be negatively affected by regulatory changes (e.g. government imposed restrictions or tariffs)

Additionally, the Fund's fixed income investments may be exposed to the following risks:

- **Credit Risk** - the risk that a borrower will not honour its obligations and this will result in losses for the investor. The Fund may hold lower-rated bonds which have a higher likelihood of defaulting.
- **Liquidity Risk** - the risk stemming from the lack of marketability of an investment that cannot be bought or sold quickly enough to prevent or minimise a loss.
- **Interest Rate Risk** - The Fund will, when valuations warrant, buy assets with long maturity dates. The purchase of these assets can result, in the event of rising interest rates, in capital losses.

Please refer to the "Risk Factors" section of the Prospectus for further information - see under "Practical Information" for how to obtain a copy.
