The Fund aims to achieve this investment objective through investing (primarily through collective investment schemes structured as exchange traded funds) up to 100% of the Net Asset Value in a diversified portfolio consisting primarily of global equities and equity-related securities and global debt and debt-related securities.

Equities and equity-related securities shall comprise equities and preferred stocks as well as depository receipts for such securities. The Fund will primarily invest in equity and equity-related securities indirectly through investment in collective investment schemes. The Fund may only invest up to 10% of the Net Asset Value directly in equity and equity-related securities, which are listed or traded on Recognised Exchanges.

Debt and debt-related securities shall comprise global fixed income securities (e.g. fixed rate bonds), floating rate securities (e.g. floating rate bonds and bank loans), variable rate bonds, index linked debt securities (e.g. index linked bonds), which are issued by corporations, governments, sovereign and supranational bodies. The Fund will primarily invest in debt and debt-related securities through investment in collective investment schemes.

The Fund may directly hold up to 40% of the Net Asset Value in debt securities comprising developed country sovereign or supranational bonds provided they have at least AA or Aa credit rating at the time of purchase. Debt securities shall be listed on Recognised Exchanges or unlisted, subject to the limits set out in the Prospectus.

The Fund may invest up to 100% of its Net Asset Value in UCITS and alternative investment funds, which are eligible for investment by a UCITS in accordance with the requirements of the Central Bank and which invest in global equities, global debt and debt-securities. For the purposes of cash management, the Fund may also make investments into Regulated Funds structured as money market funds.
