This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Integrity Global Equity Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV ("THE ICAV")

ISIN: IE00BD2ZZD12, Share Class: D USD. This Fund is managed by Prescient Fund Services (Ireland) Limited (The "Manager")

### Objectives and Investment Policy

The Fund's objective is to achieve medium and long term returns in excess of its Benchmark, the MSCI All Country World Index.

The objective is achieved mainly through investing in a range of equities (e.g. shares), which may be located in developed and emerging countries worldwide. The Fund may invest up to 40% of its net assets in equities and equity related securities (such as warrants, rights issues and preferred stocks) in emerging markets, which in investment terms are those economies that are still developing. The Fund may also invest in these assets indirectly by holding up to 10% of its net assets in ETFs or collective investment schemes.

The Fund will invest in companies that it believes are undervalued. The Fund has a global investment strategy, with no particular target in relation to any industrial, geographic or other market sectors.

The Investment Manager can make investments for the Fund at its own discretion within the predefined investment limits.

The Fund's performance is measured against the MSCI All Country World Index. The MSCI All Country World Index measures the equity market performance of developed and emerging markets throughout the world.

This Fund is actively managed in reference to the MSCI All Country World Index by virtue of the fact that the investment objective of the Fund is to outperform the Benchmark. The Investment Manager has discretion to invest in securities not included in the Benchmark at any time in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Benchmark. This deviation may be significant. The manager uses the benchmark constituents to assist in defining the investment universe. Screening for opportunities are thus done based on the list of constituents in the index as well as other equities not included in the index.

The UCITS invests in a concentrated, high conviction selection of equities. Amount of holdings will mostly be between 20 – 30 counters. The deviation from the benchmark may thus be significant.

Any income arising from the Fund will be reinvested and it is not intended that the Fund will pay dividends.

The Fund employs a long-term investment approach and a holding period of at least 3 years is suggested.

You may buy and sell shares in the Fund on each Business Day in Dublin, Ireland.

Unless otherwise defined in this document, all words and expressions defined in the Company's current Prospectus shall have the same meaning herein. Please refer to the "Investment Objectives and Policies" section of the Prospectus and the "Investment Objective and Policy" section of the Supplement for further information.

### Risk and Reward Profile of the Fund

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The Fund is classified in the category indicated above due to the past behaviour of its target asset mix. The Fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Currency Risk** - the Fund may be exposed to currency risk in relation to the valuation of assets held in currencies other than USD.

Additionally, the Fund's investments in Emerging Markets may be exposed to the following risks:

- **Political Risk** - the investments may be affected by uncertainties such as political or diplomatic developments, social and religious instability, or changes in government policies, tax and interest rates.
- **Settlement Risk** - reliability of trading and settlement systems may not be the same as more developed markets, resulting in delays in receiving proceeds when selling shares.
- **Liquidity Risk** - certain stockmarkets have low liquidity which means it may be more difficult to buy or sell shares than on a more developed market.
- **Currency Risk** - the fund may be exposed to higher risk if holding assets in currencies which fluctuate significantly over a short period of time.
- **Accounting Standards Risk** - Companies in emerging markets may not be subject to similar accounting standards to major markets, so there is a risk that their value could fluctuate significantly.
- **Custodial Risk** - custody services may be underdeveloped, meaning that a Fund may have difficulties in establishing ownership of some investments, so could suffer losses as a result.
