

# Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Sygnia Global Income Fund

a sub-Fund of PRESCIENT GLOBAL FUNDS ICAV (the "ICAV")

Share Class: C USD

This Fund is managed by Prescient Fund Services (Ireland) Limited (the "Manager")

### Objectives and Investment Policy

The Fund's objective is to achieve a net total return (both income and capital growth) over a rolling period of 5 years.

The objective is achieved mainly through investing in a portfolio of debt securities, cash deposits and money market instruments. The Fund will gain exposure to these securities primarily through direct investment but may also invest indirectly (through investment via collective investment schemes).

The Fund will seek to gain exposure to debt securities (comprising fixed and floating rate bonds, notes and debentures), listed or traded on Recognised Exchanges. It may invest up to 100% of its net assets in government and/or corporate securities (including fixed and/or floating rate debt securities), which shall be rated investment grade (BBB- or greater) (or equivalent) by Standard & Poor's, Moody's, Fitch or any other recognised rating agency). The Fund adopts a thematic approach whereby it will invest primarily in debt securities that are specifically related to environmentally sustainable activities (i.e. green bonds).

The Fund may invest up to 60% of net assets in open-ended collective investment schemes (including exchange traded funds), which are eligible for investment by a UCITS in accordance with the requirements of the Central Bank.

The Fund may also hold cash or ancillary liquid assets (including money market instruments and cash deposits) pending investment or reinvestment. Such money market instruments include, but are not limited to, cash deposits, fixed or floating rate notes (i.e. short-term instruments issued under a legally binding facility (a form of revolving credit), which are underwritten by a bank or banks) and fixed or variable rate commercial paper (which are considered investment grade or above as rated by the principal rating agencies) and US

treasury issues and shall be rated investment grade (BBB- or greater) (or equivalent) by Standard & Poor's, Moody's or Fitch. Up to 10% of the Net Asset Value of the Fund may be held in money market instruments at any time.

Investments will have a global focus provided that the Fund will not invest more than 30% of the Net Asset Value of the Fund in emerging markets.

The Fund may use financial derivative instruments (futures and options) for efficient portfolio management purposes (including hedging purposes), subject to the conditions and within the limits laid down by the Central Bank.

The Fund is considered to be actively managed in reference to the US Dollar Overnight Deposit (USDOND) by virtue of the fact that it uses the Benchmark for performance comparison purposes.

Any income arising from the Fund will be reinvested and it is not intended that the Fund will pay dividends.

The Fund is suitable for retail and professional investors with a low risk profile.

You may buy and sell shares in the Fund on each Business Day in Ireland.

Unless otherwise defined in this document, all words and expressions defined in the ICAV's current Prospectus shall have the same meaning herein. Please refer to the "Investment Objectives and Policies" section of the Prospectus and the "Investment Objective and Policy" section of the Supplement for further information.

### Risk and Reward Profile of the Fund

The risk indicator is determined using historical data or, where historical data is not available, using simulated historical data. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target or a guarantee and may change over time. A category 1 fund is not risk free, the risk of loss is small but the chance of making gains may also be limited. With a category 7 fund, the risk of losing money is high but so also is the possibility of making gains. The risk indicator for the Fund is set at 2 as this reflects the market risk arising from proposed investments.

The Fund does not offer any capital guarantee or assurance that the investor will receive a fixed amount when redeeming.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Currency Risk** - the Fund may be exposed to currency risk in relation to the valuation of assets held in currencies other than USD which fluctuate significantly over a short period of time.

- **Investment in Fixed Income Securities Risk** - Investment in fixed income securities is subject to interest rate, sector, security and credit risks. Lower-rated securities will usually offer higher yields than higher-rated securities to compensate for the reduced creditworthiness and increased risk of default that these securities carry. Lower-rated securities generally tend to reflect short-term corporate and market developments to a greater extent than higher-rated securities which respond primarily to fluctuations in the general level of interest rates. There are fewer investors in lower-rated securities and it may be harder to buy and sell such securities at an optimum time.
- **Concentration Risk** - Risk implied from the possibility of failure of investments oriented to a certain common factor, such as business in the same branch or same geographical area or trading with the same commodity etc.
- **Settlement Risk** - reliability of trading and settlement systems may not be the same as more developed markets, resulting in delays in receiving proceeds when selling shares.
- **Liquidity Risk** - certain stock markets have low liquidity which means it may be more difficult to buy or sell shares than on a more developed market.

Please refer to the "Risk Factors" section of the Prospectus and the Supplement for further information - see under "Practical Information" for how to obtain a copy.

## Charges for the Fund

These charges are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0%
Exit charge	0%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.39%
Charges taken from the Fund under certain specific conditions: Performance Fee: N/A	

The Exit and Entry charges shown are maximum figures, and in some cases an investor may pay substantially less, or there will be no charges at all. You can find out the actual entry and exit charges from your financial advisor, distributor or the Manager.

The ongoing charges figure is an estimate based on a projection of the expenses of the Fund for the first twelve months of operation of the Fund, which includes estimates of any sales charges and ongoing charges which may be levied by the underlying collective undertakings into which the Fund invests.

This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another UCITS or collective investment undertaking.

You can find more details about the charges in the section of the Prospectus entitled "Fees and Expenses" and in the Fund Supplement.
